

Es un [meningioma intraventricular](#), que ocupa el 0,1 % de todos los meningiomas

En una serie de 25 tumores de la región posterior del III ventrículo solo 1 correspondió a meningioma (Behari y col., 2011).

Se conocen solo 2 publicaciones de meningioma cordoide del III ventrículo (Song y col., 2008; Wilson y col., 2011).

Las vías de abordaje son:

[Abordaje interhemisférico transcalloso](#)

Abordaje translamina terminalis interhemisférico

[Abordaje transcortical transventricular.](#)
