

Neurocirugía

Es la revista oficial de la [Sociedad Española de Neurocirugía](#) (SENEC) y publica, desde 1990, contribuciones científicas en el campo de la [Neurocirugía](#) y Ciencias Neurológicas afines.

Nació, con diversas opiniones sobre su nombre y tutoría inicial.

Se decidió por encargar de su bautismo y tutela inicial al [Dr. José M^a Izquierdo Rojo](#), por su buena pluma y cierta experiencia editorial. Luego, transfirió esta responsabilidad por pudor; no quería compartir la edición de la revista con otros compromisos en la dirección de la [Sociedad de Neurocirugía](#).

Los primeros años no fueron fáciles. Hubo alguna iniciativa de entusiasmo juvenil, como contraportada a la recién nacida, con cierto tinte de protagonismo, que no llegó a cuajar.

Gracias al esfuerzo del Editor y del Consejo de Redacción en la primera década, se consiguió que la Revista entrara en los índices bibliográficos de la literatura médica.

El giro actual consiste en poner su publicación y difusión en manos de la Editorial Elsevier, por iniciativa de la Junta de la Sociedad Española de Neurocirugía.

La gestión de la publicidad es asumida por la propia Secretaría Técnica de la SENEK.

La [editorial Elsevier](#) es responsable de la publicación de varias revistas españolas y cabe esperar que facilite la penetrabilidad de los artículos neuroquirúrgicos en los distintos medios científicos, relacionados con las neurociencias. Este horizonte está avalado por su experiencia. Es probable que cambie el formato. Otros cambios importantes que pueda haber dependerán del número y de la calidad de los trabajos que se reciban en la Redacción.

Neurocirugía está indexada en Research Alert Institute, C.A.B., Excerpta Medica, JCR, Index Medicus/Medline e IBECs.
